

Accreditation and Quality Assurance Centre Course Syllabus The University of Jordan

1	Course title	Removable Prosthodontics practical 2
2	Course number	1304446
3	Credit hours (theory, practical)	1 hour/practical
	Contact hours (theory, practical)	2 hours weekly/practical
4	Prerequisites/corequisites	Removable prosthodontics practical -2
5	Program title	Doctor of Dental Surgery (DDS)
6	Program code	NA
7	Awarding institution	University of Jordan
8	Faculty	Dentistry
9	Department	Removable Prosthodontics
10	Level of course	4 th year
11	Year of study and semester (s)	1 st and 2 nd semesters 2022/2023
12	Final Qualification	DDS
13	Other department(s) involved in teaching the course	None
14	Language of Instruction	English
15	Date of production/revision	

16. Course Coordinator:

Office numbers, office hours, phone numbers, and email addresses should be listed.

Dr. Samiha Sartawi 23552, s.sartawi@ju.edu.jo

17. Other instructors:

Office numbers, office hours, phone numbers, and email addresses should be listed.

Dr Salah Al-Omouh, dr_omouh@ju.edu.jo

Dr Nadia Eriefij, nadia.ereifej@ju.edu.jo

, Dr Nisreen Al-Salem, n.salim@ju.edu.jo

Dr Ahmad Abdualaziz, a.abdelaziz@ju.edu.jo

Wijdan Al-Manaseer, w.elmanaseer@ju.edu.jo

Dr Rasha Al-Omouh, r.omouh@ju.edu.jo

Dr Mohammad Bustani m.bustani@ju.edu.jo

18. Course Description:

As stated in the approved study plan.

This is a clinical based Prosthodontics course where students are trained on the various steps involved in the construction of conventional complete removable dentures. The practical sessions are given on weekly basis. Theoretical background is given in the form of short talks during demonstration before the start of the related practical session. Demonstrations of the work to be done are carried out for each practical step with strict supervision to ensure that all students acquire the skills necessary to do the practical work of complete dentures taking into account the variations in the level of understanding between students. The clinical work of relation to the laboratory work is discussed with the students to ensure that the students understand each practical step.

19. Course aims and outcomes:

A- Aims:

- ❖ This is a clinical course designed to develop clinical skills and provide information for utilizing removable prosthodontics (conventional complete dentures) for the management of completely edentulous patients.
1. Provide the students with basic, current, evidence based and updated information and sufficient practical clinical background to assist them in managing completely edentulous patients using conventional removable complete dentures. This is in the form of clinical sessions.
 2. Provide clinical training on the various steps involved in fabrication of complete removable dentures.
 3. Prepare the students to be familiar with all clinical steps in conventional complete denture construction and how to manage edentulous patients.
 4. Learn how to communicate with other professionals especially dental technicians by the work authorization

B- Intended Learning Outcomes (ILOs): Upon successful completion of this course students will be able to Finish complete dentures going through the entire clinical steps.

1. Understand and get familiarized with the consequences of edentulousness, complete denture components and terminology
2. Gain competency in history taking, clinical examination and the formulation of the most appropriate treatment plan. Identifying patient's problems and rendering a diagnosis requires insight to a patient's social and medico dental background
3. Be familiar with the anatomy of the denture bearing areas in the mandible and maxilla. Understand the classification of edentulous arches.
4. Practice the principles of making primary impressions for edentulous ridges.
5. Practice the principles of making special trays for completely edentulous cases and practice

the principles of making secondary impressions for edentulous ridges including special tray adjustments and border molding.
6. Practice the principles of jaw relationships registration for completely edentulous patients and dealing with record blocks intraorally.
7. Practice the principles of tooth selection and occlusion for complete dentures
8. Practice the principles of mounting for completely edentulous cases
9. Practice the principles of setting teeth and the principles of waxing and festooning removable dentures
10. Practice the principles of wax denture trial and phonetics for removable denture.
11. Understand and Practice the principles and techniques of providing postdams for complete dentures.
12. Practice the principles of denture delivery & follow up
13. Practice the clinical techniques used in our daily practice for construction of the prostheses and maintenance of the hard and soft tissues.
14. Gain working knowledge on the management of problems and complication of the removable prosthesis
15. Practice how to authorize work to dental technicians
16. Give adequate post insertion instructions
17. Know how to deal with patients and arrangement of appointments as well as clinical time management

20. Topic Outline and Schedule:

Topic	Week	Instructor	Achieved ILOs	Evaluation Methods	Reference
1 st complete U & L dentures	1-15	According to staff clinical program	1-17	Continuous assessment	
2 nd complete U & L dentures	16-30	According to staff clinical program	1-17	Continuous assessment	

21. Teaching Methods and Assignments:

Development of ILOs is promoted through the following teaching and learning methods:

- Clinical training and demonstrations in the clinic by making upper and lower complete dentures for completely edentulous patient during 1st semester and another upper and lower complete denture for completely edentulous patient during 2nd semester.
- Clinical sessions are designed to achieve the course objectives.
- The acquired clinical skills during this course will allow the student to manage completely edentulous patients using conventional complete dentures.
- Demonstrations performed by the clinical supervisors are the main component of the teaching methods. The students treat patients under strict supervision.
- The students are responsible of the material covered during the course.

22. Evaluation Methods and Course Requirements:

Opportunities to demonstrate achievement of the ILOs are provided through the following assessment methods and requirements:

1. Continuous assessment of clinical work during 1st semester and 2nd semester (60 marks)
2. Two competencies: Competency one: Tray selection, Competency two: Upper or lower primary compound impression due at the end of the Second semester. Note: both competencies could be done simultaneously at the same visit for the same patient. The student should be prepared to do tray selection and to make an impression for another patient according to the supervisor decision.
3. Electronic OSCE exam (40 marks).

23. Course Policies:

A- Attendance policies:

- Attendance is mandatory for all clinical sessions.
- Every student will be allocated to a chair and clinic according to the serial number.
- UJ regulations will be applied when you exceed 10% of an excused absence.

- Course drop date is according to the UJ regulations.
- The dental nurse in the clinic will review the attendance in each clinic during **the first 10 minutes of clinic time.**
- Changing clinics is not allowed without previous arranged appointment under the supervision of the supervisor who allowed for the change and on the condition that this will not disturb the clinic and will not affect the work of other students who attend that clinic according to the schedule.
- Students must be punctual and are requested to stick to the same supervisor throughout the whole course and must only attend their assigned clinic according to the schedule.

B- Absences from exams and handing in assignments on time:

- Exam Dates: According to Registration Unit and the Examination committees. JU rules will be applied when student does not attend exams.
- Make up Exams: It is applicable when an acceptable and valid excuse is presented at the applicable time.

C- Health and safety procedures:

- It is mandatory for each student to wear gloves, masks, protective eye goggles, and lab coats.
- No student is allowed to treat patients if not immunized for Hepatitis.
- Any student with infectious disease (especially viral diseases) should report this to the clinical supervisor before treating or dealing with any patient.
- No student should treat any patient with infectious disease (especially viral diseases) before taking the full permission of the clinical supervisor and under strict infection control measures.
- The student is responsible for disinfecting the lab work before bringing it to the clinic.
- The student is responsible for disinfection of the clinical work (e.g. impressions,...etc) before taking it out of the clinic.
- The clinical work should be washed from blood and saliva under running tap water before asking the supervisor to evaluate them.
- Any injury by needles or any other instrument should be immediately reported to the supervisor and the JU rules and JUH regulations and protocols are applied in this case.
- Students should never handle case history sheets, clothes, log books, clean instruments, separating walls between clinics, doors, pens, their bags with infected substance (e.g. saliva, blood,..etc) on their gloves or hands. All efforts should be carried out to prevent cross infection of the clinical environment.
- The clinics should be wrapped before patients are allowed to the clinic and this should make it easier to control cross infection and disinfect the dental chair after completion of the clinical session. Disinfectants should also be used to disinfect the dental chair after the removal of the cling films.
- No impression materials or wax or remnants of any material should be left in the sink of the dental chair or the hand washing basin to avoid cross infection and blockage of the sink.
- Patients should wear aprons to protect their clothes.
- Patients' medical history and status should be taken into full consideration every clinic and during the whole clinical session. Report and medical problems that might interfere the treatment.
- It is mandatory to wear the coat outside before getting into the clinic and it is strictly forbidden to enter the clinic without the coat being on. Also, students are not allowed to take their coats off until they exit the clinic. This measure is very important to control cross infection in clinic.

D- Honesty policy regarding cheating, plagiarism, misbehavior:

- Cheating is unethical and illegal by any means
- UJ regulations will be applicable
- The work should be your own, otherwise it will be scored zero

E- Grading policy:

- Continuous assessment sheets are marked every clinical step and will be kept in special locker with the responsible dental nurse of the clinic.
- No case will be marked or considered without a signed case history sheet

F- Available university services that support achievement in the course:

- Laboratory services and clinical services with dispensary points to provide the required materials and certain instruments. Supervisors will be available all the time and produce all help necessary

24. Required equipment:

You need to bring the following armamentarium during each clinical session:

- Impression trays of different sizes and for different purposes.
- Wax knife, Lacron carver and Plaster Knife
- Loop forming pliers and Wire cutter
- Rubber bowel and Plaster spatula
- Protective glasses, Lighter and Pencil (copia)
- Gloves, masks and Eye protective glasses
- Clean and Tidy Laboratory white coat available every clinic. Name badge mounted all the time during the laboratory sessions
- This list will be checked during the clinical session.
- Students are not allowed to share instruments in order to prevent cross infection.

25. References:

A- Required book (s), assigned reading and audio-visuals:

As below.

B- Recommended books, materials, and media:

- Essentials of Complete Denture Prosthodontics by Sheldon Winkler (1994)
- Prosthodontic Treatment for Edentulous Patients: Complete Dentures and Implant-Supported Prosthesis by George A. Zarb, Charles L. Bolender, Steven E. Eckert, and Aaron H. Fenton (2003)
- Prosthetic Treatment of the Edentulous Patient, 4th Edition. RM Basker and JC Davenport; 2002, Blackwell Munksgaard Publishers
- The Complete Denture: A Clinical Pathway. Michael MacEntee; 1999. Quintessence Publishing Co, Inc
- Clinical dental Prosthetics, 4th edition. Roy MacGregor
- Complete denture Prosthetics, 3rd Edition. RJ Neill and RI Nairn; 1990

26. Additional information:

Participation:

- All students are highly encouraged to participate in the clinical sessions.
- Quizzes and brain storming questions will be essential part of the course.
- All Students are highly encouraged to finish all the requirements of this course in due time.
- Being a positive party during this course will be helpful.
- Never be shy to participate & ask where you get it wrong.
- Make use of the time by attending the clinic even if you do not have patients in order to see cases of other students and learn from others' mistakes and cases.
- No student should relay on the clinical supervisor to do the work for them. Supervisors are to help you not to do your job. This does not mean that the supervisor should not interfere whenever required to do so.
- No student should do the work of other student and this will negatively affect you.
- Home reading: Students should study at home for every clinical and laboratory step during constructing complete denture. Clinical exams and assessment will include topics covered in the 3rd & 4th year concerning complete & partial dentures. Students should read and prepare at home for every clinical step they are supposed to do at the clinic and they will be subject for evaluation, assessment and marking.

Lab Work:

- A lab form should be completed and signed by the clinical supervisor before sending the work to the lab. The instructions should be fully detailed and clear to avoid any lab errors.
- The student work should be marked with the students' name and university number.
- The student is responsible sending and receiving the work from the lab and for maintenance of primary models, special tray, secondary models, record blocks, articulators, and the finished denture.
- Professionalism during communication with the lab to facilitate your progress in the course.

Students with special needs:

- Any student who feels that s/he may need accommodation for any type of disability is encouraged to contact the course coordinator who will be happy to help in any way.
- Accommodations to the course plan can be tailored to the needs of specific individuals after consultations with the dean

Professionalism:

- Professions tend to be autonomous and self-sufficient i.e having a high degree of control of own affairs while having freedom to exercise professional judgment.
- As it is a trait, which can be easily enhanced, it is thus subject to self-interest and a continuous process of critical evaluation of ethics and procedure.
- As the students have been part of the university for some considerable time, they would be familiar with general principles about it's beliefs on matters such as quality studentship within this environment. We thus expect our students to develop their professionalism even further together with a high Morality. And Dentistry is one of these professions based on such Ethical codes.
- Gross violations of these formal codes are governed by University laws, which delineate the procedures to determine whether a violation of the code of ethics occurred and, if so, what remedies should be imposed.
- This does not mean the list is complete. We encourage students to abide with the more sensitive approach to this by allowing the practice of a high Morality (or proper behavior),

which defines right and wrong by the society, philosophy, religion, and individual conscience.

- Students and their instructors often make ethical choices reflexively. But ethically sensitive situations, where time, emotions and marks are pressured, it becomes all too easy to be blind-sided by temptation. The best antidote to ethical lapses is to commit in advance to a set of ethical principles - your personal ethical code that follows or grows to it.
- The course coordinator is always available to talk with the student when problems arise. If a student must talk with the course coordinator after office hours, an appointment can be made for that time.
- If you have any problems that require the attention of an instructor, do not wait until the problem is insurmountable. Do not allow tension to build-up to unsolvable proportions.

Course changes:

- Information contained in this course outline is correct at the time of publication.
- Content of the courses is revised on an ongoing basis to ensure relevance to changing educational, employment needs.
- The course coordinator reserves the right to add or delete material from courses and will endeavor to provide notice of changes to students as soon as possible.
- The timetable may be revised accommodating to holidays & unexpected off days
